ways to apply emerging technologies to transform the knowledge implicit in effective practice and educational transformation efforts into ideas, theories, and resources that can be shared and

The [MERLOT Awards Program for Exemplary Online Learning Resources](#) recognizes and promotes outstanding online resources designed to enhance teaching and learning.

For example, James Rutledge, a Mathematics professor at St. Petersburg College, created a MERLOT user snapshot to document his efforts and experience in using an online learning material "Exploration of Fibonacci Numbers in Nature and the Arts" (developed by Ron Knott at University of Surrey, UK). In the snapshot, he described
